ger is quickly averted.

It is not generally known, but such is the fact, thachildren require medicine oftener than their parents. Three-tourths of the children die before they attain the age of eight years. Let mothers, then, be wise and give to their children small doses of these invaluable Filis once or twice every week, its such quantity as may act gently upon the system twice in the twenty-tour hours. For infants, a Pill may be crush, ed and given as a powder in a little water. The gross humors that are constantly floating about in the blood of children, the forerunners of so many comaints, will thus be expelled, and the lives of thousands saved and preserved to their parents.

JOB PRINTING. To Book and Job Printing of every description neatly executed. Terms, cash on delivery of the work.

WHY SHOULD WE NOT HAVE A MINT IN VICTORIA.

The recent large arrivals of gold from the upper country may be considered as the fore runners of a constant series of large remit fances from that part of the colony Henceforth there can be no doubt but there will be a steady increase of the yield of the mines. The creeks already producing are constantly being extended by the opening o new claims; whilst new creeks every day found to be of a similar character to those where our richest diggings lie. The opening up of the country by good trails will nable the hitherto inaccessible portions to be explored and undoubtedly greatly extend what was at first considered to be the gold producing area of Cariboo. Henceforth there need no longer be any fear on the score of dear provisions. This drawback of the past will be obviated by improved means of communication. Winter and summer the carriage of goods may continue, so that there will be nothing to prevent claims being worked to advantage all the year round. The result of all this cannot fail to do otherwise than give rise before long to a perfect flood of the precious dust from the upper country.

Such being the case it becomes a question well worthy of our consideration, whether it would not be advisea ble for us to devise some means of rendering this vast amount of treasure more generally available than is the case at present. The proper dectination of the gold is to be converted into coin. All this has now to be done out of the country. The mint at New Westminster though having gone to the trouble of having die.s provided, has as yet produced nothing. It is now nothing more than an assaying office. It neither benefits this nor the neighboring colony so far as minting is concerned. It is incon- HIGHLY IMPORTANT! veniently situated, even if it were in full operation. Most of the miners in coming to the lower country, make Victoria their place of destination. Here they bring most of their dust. Here all the accommodation necessary to convert it into money should be afforded, and the expense of shipping coin and dust saved. In short we want a branch mint, In a commercial emporium such as this city is rapidly becoming, such facilities as are generally afforded by that kind of an institution should not be wanting. In a very short time a large quantity of the Cariboo and Peace River gold will find its way here by the coast routes. It would be exceedingly inconvienent then if there was no choice left for converting it into coin but New Westminster and San Francisco. If there were a mint here, there there would be a probability too of our receiving considerable quant ties of gold for assay and coinage from the neighbouring territory. Altogether, the arguments are in favour of a mint being established here. It should have been done long ago instead of locating in an out of the way place like New Westminster, but since w were not favoured with that institution, let us have one of our own.

THE POLICE MAGISTRATE AND CONCERT SALOONS.

The police magistrate deserves the support of every right minded man in the community for the energetic stand he has taken against the employment of "pretty waiter girls," as they are called, to serve in the concert saloons of this city. Wine and women have been the bane of many a man from the days of Noah down to our day. The association is most generally a bad one, and one which should receive no degree of encouragement. It has been found necessary both in the cities of New York and San Francisco to pass severe laws for the suppression of similar institutions to those complained of here. It may be that

Thomas Pattrick & Co. some of them are commenced with no bad motive, and with a desire to conduct them properly; but it is a notorious fact that they ilmost universally degenerate into sinks of iniquity of the worst kind. Women can be employed in those places for no other purpose than to serve as lures to attract men. They are not absolutely necessary as waiters. Their places in that capacity can be as efficiently and cheaply filled by young men, and with less danger to the morals of the community. Nor is there a severe glut of the market of female labor that any young woman need be driven to act the Hebe, or something worse, for any saloon. There is quite a sufficient demand for steady girls to act as servants in respectable families, and

at very fair wages.

Besides all this it is an absolute reproach to society here that so many girls should be induced by high wages to enter an employment which has every tendency to blast their reputation and render them outcasts before the world. There is an absolute and great disproportion between the sexes in this country. There is a want of good steady industrious girls to furnish virtuous wives for our men and make them something else than the reckless restless mortals so numerous or this coast. To supply this want must be one of the objects of any measure for the encouragement of emigration, and any thing that will interfere with this end should be tabooed.

NANAIMO, V. I., August 7th 1863. Editor British Colonist—Sir: Mr. Ring he found that there was only one section which gave one unagistrate the power of acting sub judice. He submitted that his Worship as a stipendiary Magistrate had not the power to try the case. The license were granted by a bench of magistrates and one magistrate could not undo nor could he cancel a license which had been granted by a quorum.

Mr. Pemberton—I do not say I have the power to cancel the license, but I can inflict a penalty the same as in cases of assault.

Mr. Bishop was here proceeding to refer to legal authorities.

Mr. Pemberton—This is an offence against the license, and does not come under the litth and 12th sec. of Victoria. I do not only sit here to exercise the functions of stipendary magistrate; other cases come before me he found that there was only one section which gave one magistrate the power of acting sub judice. He did not expect such an objection, but if Mr. Bishop insisted upon time for the production of the license, he must grant it.
